How we select our investment managers and Investment Options

Investment choice

Centuria LifeGoals Education Bonds offer a broad investment menu covering the following asset classes: cash, fixed interest, international and Australian shares and diversified funds.

Centuria LifeGoals Education Bonds provide access to a wide range of high-quality active investment managers selected by Centuria Life and low cost specialised index investments.

How we select the underlying managers

The active investment managers have been carefully selected to offer a high level of expertise in their chosen fields. They offer different investment styles to satisfy a wide variety of Investor goals.

Active investment managers conduct research and choose to be underweight or overweight in different stocks and sectors. Their objective is to outperform a relevant index. These investment managers will typically charge a higher fee than index managers and may charge a performance fee. We provide access to a range of active investment managers that vary in style and objectives, who have been selected based on a range of measures.

As part of the selection process, our team meets with and interviews prospective investment managers. Our research is focused on providing access through the Investment Options to high quality investment managers in each asset class.

We will conduct reviews of the investment menu to monitor whether each Investment Option and investment manager is operating in a manner consistent with the description in the PDS. At times, investment managers with a certain style or bias may underperform and this will be monitored by Centuria Life and investment managers may be replaced from time to time.

Low cost index options are also available to Investors. Index managers aim to replicate the performance of the relevant index they track and will typically have lower management fees as they do not conduct the in-depth research required for active investment management. For example, an Australian large cap share index manager seeks to mirror the performance of the ASX All Ordinaries Index by replicating its holdings.

Centuria LifeGoals Education Bond offers a variety of Investment Options managed by a range of active managers and specialised index managers. Therefore, our Investment Options are able to help fulfil the investment strategies of a diverse group of Investors.

Investors can select the investment managers and asset classes that best meet their objectives, financial situation and needs.

Investment process

We believe that investment choice is important for Investors. Selecting the right investment manager is an important investment decision.

Centuria Life undertakes research and due diligence enquiries to select and review the investment managers and funds to place on the investment menu.

The diagram below summarises the key considerations Centuria Life uses to select investment managers.

About this Investment Options Booklet

Centuria Life believes that a robust investment process is important to making good long-term decisions.

In reviewing investment managers, Centuria Life considers the following:

Fund characteristics

- Investment style such as value, growth or quantitative.
- Competitive fee structure.
- Funds under management relative to sector size that may influence ability to execute trading strategies.

Research house ratings

- Research from a number of independent research agencies are analysed and only those funds with superior ratings will be considered.

Quantitative analysis

- Superior risk-adjusted returns to peers.
- Absolute return comparisons that include trailing total returns, calendar period performance and rolling-period results versus appropriate style-based benchmarks and/or peer groups.
- Various risk or return volatility measures such as standard deviation, beta and/or maximum drawdown analysis.
- Regression analysis.
- Risk adjusted metrics, such as Alpha Ratio, Sharpe Ratio, Information Ratio and Sortino Ratio.

Qualitative analysis

- Centuria Life will meet and interview prospective investment managers to make well-informed investment decisions.
- ASn analysis of investment professional talent is important in the evaluation of investment managers.
- We generally look for established investment teams that have worked together for a number of years.
- Low staff turnover is generally desirable.

Centuria Life also takes advice from external experts and investment consultants and its actuary (appointed pursuant to provisions of the Life Act) on a range of investment management matters.

In implementing the investment strategies of the Centuria Education Bond, we may from time to time:

- add, remove or replace investment managers. The structure of the Bonds means investment managers who do not meet the investment criteria can be replaced without tax implications to the Investor. This is an advantage of Centuria Education Bonds over a managed fund or share investment where the change of a trustee/underlying investment manager may have CGT implications for Investors; and/or
- write to Investors providing at least 30 days notice of the intention to replace an investment manager, outlining why the change is being made and will provide information on the replacement investment manager; or

- cease to accept new contributions into one or more of our Investment Options.

Centuria Life Investment Committee

Our Investment Committee is responsible for approving and overseeing the implementation of the investment strategy for each of the Investment Options. The Investment Committee is responsible for making decisions on matters such as asset allocation, investment manager selection and portfolio construction. The Investment Committee also takes advice from external experts and investment consultants and our Appointed Actuary, on a range of investment management matters. Our Investment Committee meets regularly to review the investment strategies for the Investment Options.

We select investments after conducting a detailed review process, which includes regular meetings with current and External Managers, consideration of their investment style, investment process, the expertise of their investment team, past performance and other factors. We also review our External Managers' performance on an ongoing basis to ensure they operate in accordance with our specified investment criteria.

Each of our External Managers (including any who are our related companies) are entitled to receive fees for their services at commercial rates as agreed from time to time by us.

Authorised investments

The assets of each Investment Option must be invested in accordance with the Life Act (including any prudential standards made under the Life Act) and the Fund Rules.

The Fund Rules specify a range of authorised investments into which the assets of an Investment Option may be invested (see PDS, page 42 for details on how you can view a copy of the Fund Rules).

Use of derivatives

We and/or the External Managers may use derivatives, such as futures and options, for hedging purposes and/or to implement an investment strategy. However, we and/or the External Managers will not use derivatives for gearing purposes or speculative activities. If derivatives are used, it is on the basis that the relevant Investment Option can always meet its commitments without having to borrow.

Labour standards and environmental, social and ethical considerations

In setting or implementing investment strategies for Centuria Education Bond, and when selecting or retaining the investment manager, we do not give additional weight to labour standards or environmental, social or ethical considerations.

Meet the investment managers

Centuria Life has selected a range of leading investment managers that provide Investors with a choice of sector and diversified funds. Centuria Life's focus is on investment managers who have a track record of strong performance. A brief summary of each investment manager used in the Centuria Education Bond platforms is set out below.

Betashares Capital Limited (Betashares) is an Australian fund manager that specialises in Exchange Traded Funds (ETFs). Established in 2009, Betashares has grown to become one of the market leaders in ETFs and has a wide range of exchange traded products on the ASX. Betashares' philosophy is to create intelligent investment solutions that broaden the investment possibilities for Australian investors. Betashares products provide access to a wide range of market indices, asset classes and investment strategies, all of which can be bought or sold like any share on the ASX.

Dimensional is a leading global investment firm that has been translating academic research into practical investment solutions since 1981. Guided by a strong belief in markets, Dimensional offers strategies that focus on the drivers of expected returns.

The firm applies a dynamic implementation process that integrates advanced research, methodical portfolio design, and careful execution, while balancing risks, costs, and other tradeoffs that may impact performance. This approach is applied across a full suite of investment strategies to help meet the needs of investors worldwide.

DWA is a thematic investment manager, with its core philosophy being to provide an investment service that attempts to preserve and grow capital by investing in asset classes that match their thematic view. DWA will select investments or specialist managers to manage investments that align with its macro view and outlook for the domestic and global economy and global investment markets.

The CAREphilosophy® is founded on the principle of broad market diversification across all asset classes. DWA believes in diversification and that holding assets for the long term will deliver better returns than trading portfolios and timing the market in the short term.

FIL Investment Management (Australia) Limited is a member of the group of companies known as Fidelity International ('Fidelity'). Fidelity is one of the world's leading asset managers with a global network researching investment opportunities in the US, Europe, the Middle East, Africa and Asia Pacific. Trusted by institutions, governments, foundations and individuals to manage approximately \$A959.1* billion in assets, we provide a diverse range of investment solutions including real assets, real estate, credit and equities & multi-asset.

Perpetual Asset Management Australia is a dynamic, active manager, offering an extensive range of specialist investment capabilities including Australian and global equities, credit, fixed income, multi-asset as well as environmental, social and governance (ESG), designed to help meet the needs of our clients. Perpetual's Multi Asset funds invest across a diverse range of investment opportunities, which can include domestic and global shares, credit and fixed income, cash, property, infrastructure and a range of other investments all combined within a single fund.

As one of Australia's longest serving and most trusted investment managers, Perpetual's long-standing commitment is to deliver superior outcomes over the long-term for our clients.

*As at 30 September 2025. MAM Private Markets Assets under Management (AUM) includes equity yet to deploy and equity committed to assets but not yet deployed.

Meet the investment managers

Real Asset Management Pty Ltd (RAM) is an Australian alternative asset management firm, providing investment solutions in credit, real estate and private equity markets, for institutions and wealthy families globally. RAM was founded in 2010 and has a pan-Asia presence of 6 offices in Sydney, Melbourne, Brisbane, Auckland, Shanghai and Hong Kong. RAM provides more than 15 investment strategies and has a team of over 200 finance professionals managing circa A\$7bn in assets.

RAM’s credit expertise extends from public market senior and subordinated strategies into less liquid private credit and direct lending secured exposure. Our credit process ensures our portfolios are biased to high quality and reliable income streams, and focused on achieving the investment objective with a low probability of credit losses. Our investment management philosophy, discipline and strict portfolio construction rules always ensure appropriate diversification and risk management.

Its management team has collectively over 150 years of experience gained through working in senior global and regional management positions in some of the world’s largest financial services firms. (AFSL 484263).

Vanguard

With over AUD \$16.67 trillion in assets under management globally as of 30 June 2025, including AUD \$5.48 trillion in ETFs, Vanguard is one of the world’s largest global investment management companies. In Australia, Vanguard has been serving financial advisers, retail clients and institutional investors for nearly 30 years.

Risk level of Investment Options

Standard risk measure

Centuria Life uses the Standard Risk Measure (SRM), as detailed in the table below, to allow Investors to compare Investment Options based on the number of negative annual returns over any 20-year period. The risk level of each of the Investment Options using the SRM can be seen on pages 10-28. Investors should be aware that the SRM does not take into account all types of investment risk and that it does not constitute financial or personal advice. Investors should consider all relevant risks when considering which Investment Options to invest in. Investors should also note that changes in the market and the methodology of calculating the SRM may alter the SRM.

Risk band	Risk label	Estimated number of negative annual returns over any 20 year period
1	Very low	Less than 0.5
2	Low	0.5 to less than 1
3	Low to Medium	1 to less than 2
4	Medium	2 to less than 3
5	Medium to High	3 to less than 4
6	High	4 to less than 6
7	Very High	6 or greater

Investment Options

There are a range of Investment Options to choose from that invest in a single underlying manager across a range of asset classes. Centuria Life have selected high quality active investment managers with a low-cost index option available to investors for each major asset class. The active investment managers have been carefully selected to offer a high level of expertise in their chosen fields. They offer different investment styles to satisfy a wide variety of investor goals.

Cash and fixed interest funds

These conservative funds invest predominantly in cash and fixed interest.

Investment Option	Centuria Education Bond Macquarie Treasury Fund	Centuria Education Bond RAM Australian Credit Fund
Risk level	2 - Low	3 – Low to medium
Investment manager	Macquarie Asset Management	Real Asset Management Pty Ltd
Recommended minimum investment	One year	Three to five years
Investment objective	Aims to perform in line with the Bloomberg AusBond Bank Bill Index over the short term (before fees) by using a low-risk investment strategy.	This Fund aims to provide a return (before fees, costs and taxes) that exceeds the official Reserve Bank of Australia cash rate by 3% per annum over the medium term, with high levels of capital stability.
Investment strategy	The Fund is designed for investors seeking a treasury management solution that provides exposure to a portfolio of highly-rated cash and short-term fixed interest securities, primarily issued by banks, corporates and the Australian government. The permitted securities include, but are not limited to, negotiable certificates of deposit, short-dated floating rate notes and deposits. The Investment Manager's cash management approach is driven by disciplined and thorough processes backed by in-house quantitative analysis. The Investment Manager aims to enhance returns by formulating views on the likely direction of short-term interest rates and positioning the Fund to benefit from these views. The Fund also seeks to add value through low-risk enhancements such as deposit accounts and short-dated floating rate notes. The Fund may be exposed to derivatives, including derivatives that increase in value when the underlying instrument falls in value, and decrease in value when the underlying instrument rises in value.	The investment strategy is to primarily invest in secured mortgages against Australian property, asset backed securities, securitised investments and cash. The fund will invest in debt securities (ASX & OTC) issued by RAM Income Capital and units in the RAM Real Income Fund Class A1 & A2. The Investment Manager will seek to control any short-term capital volatility by investing in high quality assets and by managing a diversified portfolio of income producing assets in the underlying investment vehicles.

Investment Options

Investment Option	Centuria Education Bond Betashares Wealth Builder Diversified All Growth Geared (30-40% LVR) Complex ETF Fund
Risk level	7 – Very high
Investment manager	Betashares
Recommended minimum investment period	7 years
Investment objective	<p>The investment objective of the Betashares Wealth Builder Diversified All Growth Geared (30-40% LVR) Complex ETF is to provide geared exposure to the returns of a diversified share portfolio, invested in equities from Australia, global developed and emerging markets. There is no assurance or guarantee that the returns of the Fund will meet its investment objective.</p> <p>The Fund intends to provide geared exposure to the returns of the Australian and global share markets in all market conditions. This means in a falling share market, investors should not expect the Fund's level of gearing to be reduced below the anticipated gearing range from time to time or investments to be repositioned, in an attempt to avoid or reduce losses.</p>
Investment strategy	<p>The Fund intends to implement the investment strategy by combining application money from investors with borrowed funds and investing in a portfolio that provides exposure to a broadly diversified basket of Australian and global equities. The Fund may hold these securities directly or obtain this exposure by holding shares or units of one or more exchange traded funds. The Fund intends to obtain the equity exposure by investing in the Underlying ETFs. The Fund's borrowings will be denominated in Australian dollars. The Fund is 'internally geared', which means the Fund borrows the money instead of investors. Gearing can be expected to magnify both investment gains and losses, and consequently significant variations in the value of the Fund's investments can be expected. Australian and US dollar cash and cash equivalents may be held in the Fund.</p> <p>The Fund will have a long-term target exposure of 100% in growth assets. The table below shows the strategic asset allocation ('SAA') to each asset class in which the Fund will invest to provide exposure to the asset classes.</p>

Risk level	6 – High	6 – High
Investment manager	Betashares Capital Limited	Perpetual Investment Management Limited
Recommended minimum investment period	Seven years	Five years or longer
Investment objective	The investment objective of the Fund is to provide an investment return that tracks the performance of the Solactive Australia 200 Index (the 'Index'), before taking into account fees and expenses.	The Fund aims to provide investors with exposure to a diversified portfolio of tax-effective high income yielding Australian securities that are also expected to produce some long-term capital and aims to deliver an above market dividend yield as measured by the S&P/ASX 200 Accumulation Index.
Investment strategy	In seeking to achieve the investment objective of the Fund will employ a passive management approach designed to track the performance of the relevant Index, before fees and expenses. The Fund will generally seek to invest in the securities that comprise the relevant Index in proportion to the weightings of the securities in the Index. This is known as a 'full replication' strategy. As far as practicable, the timing and nature of any changes to the composition of the Fund's investments will generally correspond with the timing and nature of changes to the relevant Index. The holdings of a Fund may not always exactly replicate its index.	Perpetual researches companies of all sizes using consistent share selection criteria. Perpetual's priority is to select those companies that represent the best investment quality and are appropriately priced. In determining investment quality, investments are carefully selected on the basis of four key investment criteria: conservative debt levels, sound management, quality business and recurring earnings. Derivatives may be used in managing the Fund.

Investment manager	Betashares Capital Limited	Betashares Capital Limited
Recommended minimum investment period	Seven years	Seven years
Investment objective	The investment objective of the Fund is to provide an investment return that aims to track the performance of the Solactive GBS Developed Markets ex Australia Large & Mid Cap Index (an index comprising approximately 1,300 developed markets companies), before taking into account fees and expenses. The index is designed to provide exposure to the world's largest developed markets companies, based on free float-adjusted market capitalisation (ex Australia).	The investment objective of the Fund is to provide an investment return that aims to track the performance of the Solactive GBS Developed Markets Currency Hedged ETF ex Australia Large & Mid Cap Index (an index comprising approximately 1,300 developed markets companies), before taking into account fees and expenses. The index is designed to provide exposure to the world's largest developed markets companies, based on free float-adjusted market capitalisation (ex Australia).
Investment strategy	In seeking to achieve the investment objective of the Fund will employ a passive management approach designed to track the performance of the Index, before taking into account fees and expenses. The Fund will seek to track the relevant Index by adopting a 'sampling' strategy. Under this approach, a Fund will not hold all of the securities comprising the relevant Index and may hold securities in weightings which differ from the Index. A sampling strategy is often used for funds tracking an index that is too broad to efficiently purchase all of the index's securities.	In seeking to achieve the investment objective the Fund will obtain investment exposure to the securities listed in the index indirectly, by investing substantially all of its assets in units of the Betashares Global Shares ETF, an exchange traded fund admitted to trading on the ASX. As the Fund is hedged to Australian dollars, for index-tracking purposes, the Fund intends to hedge the currency exposure using forward foreign exchange contracts (or similar instruments), with the objective of substantially offsetting the Fund's exposure to movements in the relevant foreign currency. While this approach seeks to minimise the impact of currency fluctuations on Fund returns, it does not necessarily eliminate exposure to all currency fluctuations.
